

# EAYSIN ARAFAT

+8801643226078 | [eaysin.arafat.j@gmail.com](mailto:eaysin.arafat.j@gmail.com) | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

2 years of frontend experience having built a solid foundation in **backend development**. React, Next.js, TypeScript, backend development and testing.

## EXPERIENCE

### React Developer

*January 2023 - February 2024*

Excel Technologies Ltd., House #13, Road #07 Block #F, Banani Dhaka-1213

- Developed and integrated key modules in the Carepro Health Ecosystem, including form interactions, patient management, and treatment tracking for a government-sponsored healthcare system.
- Contributed to the TUSO System Issue Tracking Platform, focusing on secure user authentication, real-time notifications, and live troubleshooting via Remote Desktop Protocol (RDP).

### React Developer

*March 2024 - August 2024*

Blackrock IT Solutions, Mesa, Arizona

- Implemented the scheduling system for HybridChart, enhancing real-time collaboration between healthcare staff for improved workflow.
- Led the development of the Timesheets and Request Module in TechConnect, an employee management platform, integrating APIs for real-time data updates and secure role-based access.

## SKILLS

JavaScript | TypeScript | React | Next Js | Tailwind CSS | Redux | Jest | Vitest | Express Js | MongoDB

## PROJECTS

### react-form-interactions

A **React library** that simplifies form **state management and validation**, supporting comprehensive validation rules and custom rules, designed for seamless integration with React using hooks and functional components.

- **Git Repository:** [GitHub](#)
- **NPM Reference:** [react-form-interactions on NPM](#)
- **Technologies used:** TypeScript, React.js

### Sync-Workbench

A broad **HR management application** that aims at managing the relationships between the company's employees and the organization.

- **Frontend:** Built interactive **React-based dashboards** for managing employees, projects, and performance with intuitive role-based interfaces.
- **Backend:** Developed secure APIs using **Node.js** and **Express.js**, ensuring scalability and seamless integration with third-party tools.
- **Key Features:** Role-based access, employee profiles, time tracking, payroll, analytics, compliance tools, and workflow automation.
- **Technology Stack:** TypeScript, React, Tailwind CSS, Redux Toolkit, Express Js, MongoDB
- **GitHub Repositories:**
